

Abhishek Kumar

Front-End, MERN, React Ecosystem, UI/UX, Web Design

As a web developer (MERN Stack), I have cultivated my skills within the React Ecosystem. However, I am dedicated to consistently enhancing my proficiency in DSA to ensure a well-rounded problem solving skill. I firmly believe in Project-based learning and have showcased my best works in my personal portfolio. Adopting emerging technologies and seamlessly integrating them into my work is what I do best. I believe I bring something unique to the table with my experience in web design and web development together. I am eager to work with you, bonus if you recognise my strengths and put them to good use.

SKILLS

- JavaScript , TypeScript, Python , C++
- NEXT.js, React, Node.js, Express.js, Redux/Toolkit
- HTML, CSS, Tailwind, GitHub, Git version Control
- Figma, Webflow, Framer
- MongoDB, Restful APIs
- Critical Thinking, Emotional Intelligence, Networking / Relationship building
- 150+ WPM Typing Speed on a "qwerty" keyboard

PROJECTS

- **Zaffran (Fine Dining Website):** "Zaffaran" an Indo-Persian cuisine restaurant. My Goal was to provide an aesthetic website for a local restaurant chain and turn it into a business.
 - GitHub Link : [View Project](#)
 - [Live Link](#)
 - Skills used : Figma, React, Adobe Creative Suite
- **3D Custom T-Shirt Design:** Unleash your endless creativity! You have the ability to design your own unique T-shirt with our easy-to-use tools. Select from a broad range of 15 eye-catching hues, and don't forget to include your logo or pattern.
 - GitHub Link : [View Project](#)
 - [Live Link](#)
 - Skills Used : React, Three.JS, Tailwind, Framer Motion
- **Cyber Assets (A one stop destination for Crypto News):** An App for being up to date with latest info about the crypto market, and making the correct decision. Has features like Top Crypto Coins, Latest News, Latest Exchange ,top coins, Market Cap, Market Volume, using various crypto APIs.
 - GitHub Link : [View Project](#)
 - Skills Used : React, Redux, Router, Ant Design, Rapid API
- **Promptopia - NEXT.js Authentication:** This is a simple project which I made to understand the routing, authentication, database connection via MongoDB and backend integration in NEXT.js.
 - GitHub Link : [View Project](#)
 - Skills Used : NEXT.js , NEXT Auth, BeCrypt, Mongoose

WORK EXPERIENCE

- **Software development Intern | TATA Steel (2019):** Developed an app for assessing the status of mill operation at the TSCR Steel rolling department. The app showed the up to date status of the steel coils, temperature, pressure, and other parameters during the manufacturing process.
- **Freelance Video Editor | Self Employed (2021-2022):** Learned using various design tools such as Adobe Premiere Pro, Photoshop, Illustrator, Figma. This is where I also learned the logo designing and how to edit media to retain a viewer while also keeping the vision of the client in mind.

Certification / Courses

- **Prashikshan:** Summer Internship program Certificate Conducted by SNTI (TATA Steel). The responsibility given was of software development and software testing.
- **Full Stack Open Source Cohort:** Full Stack Open Source bootcamp conducted by Harkirat Singh, an IIT alumni. The course focused primarily on creating full stack web applications, while also getting a decent idea of open source contribution through GITHUB. Hosting our own application on Vercel as well.
- **1-100 *Live Advance Web Dev (Currently Doing):** This course revolves around learning the advanced technologies and concepts which include : Low level system design, Redis, Kafka, Load Balancers, Docker, CI/CD, Kubernetes etc.

Education

- **Senior Secondary:** Jamshedpur Public School | Jamshedpur : 9.4 CGPA
- **Higher Secondary:** DAV Public School | Jamshedpur : 87%
- **B.Tech | Information Technology:** Motilal Nehru National Institute of Technology (2017- 2021) **Dropped Out**

Miscs / Interests

- **Languages :** English, Hindi, Kannada (Newbie)
- **Interests :** Singing, Guitar, Drones, Film Making
